

Forum on Resilience in Industry
November 18–19 | Gütersloh, Germany

Services, Technologies, and Methods for Corporate Stability and Development
Status: March 11, 2026

Renowned partners from the fields of banking, private banking, corporate finance, auditing, and legal consulting are already on board!

Event framework:

- **40 patrons and sponsors**
- **Up to 50 media and network partners from across the DACH region**
 - **80–100 solution providers**
 - **100 new solutions and startups**
 - **600–800 visitors per day**

We are currently seeking solution providers (including startups) and industrial partners presenting best-practice examples for the following focus areas:

- **Industry & Technology:** Automation, robotics, AI, industrial software, predictive maintenance, new materials, retrofit, additive manufacturing
- **AI in Practice:** Applications in production, logistics, quality assurance, procurement, energy, administration, and management
- **Safety & Stability:** Cybersecurity, data protection, compliance, risk management, supply chains, logistics, and warehousing
- **Energy, Environment & Sustainability:** Energy optimization and generation, recycling, water, environmental protection, waste management
- **People & Organization:** Skilled labor, employer branding, training and development, leadership in the AI era, employee benefits
- **Locations & Infrastructure:** Regions and countries (global), industrial parks, commercial properties, logistics, relocation, protection & security

- Bureaucracy & Regulation: Funding, reporting and approval procedures, cooperation with public institutions
- Owners & Family Businesses: Health & personal resilience, succession, inheritance & legacy, foundations
